

POINT OF SALE (POS)

— BY RMS THE HOSPITALITY CLOUD

The all-in-one solution to improve efficiency and profitability of your business.

RMS ePOS provides you with fast, reliable, easy-to-use software with the flexibility to grow as your business expands.

RMS ePOS is a dedicated point of sale solution. Your customers will experience faster and smoother service and your staff will appreciate how simple it is to operate.

Catering for single-sites or multiple outlets, RMS ePOS puts you firmly in control of what happens at your point of sale.

ALL-IN-ONE-SOLUTION

RMS ePOS helps properties manage their inventory and accounts, generate real-time sales reports and simplifies customer interaction.

It automates any manual tasks, monitors stock movements, reduces theft and wastage and improves customer service.

And all of this is integrated into the RMS or your Property Management Software.

The features of the system allows you to automate tasks that previously had to be done manually, monitor stock movements, reduce theft and wastage and improve customer service.

User Log: Each user is assigned a password to log into the application

Room Charging: Any point of sale outlet can charge back to a guest room at the touch of a button.

Reporting: There are over 150 reports - get an instant snapshot of actual profitability from sales. Save the most used reports to a favourites tab for instant access.

Table Reservations: Seat your venue to capacity and avoid over booking. Print off reservation list with contact details for staff so seating can be arranged to suit.

Recipe costing: The recipe master will cost out the of an item based on the cost of raw ingredients used to calculate cost price.

Bill Splitting: Not a problem with RMS EPOS - the bill can be split in a variety of ways.
