

Smarter payments, Better bottomline

RMS PAY delivers an all-in-one payment solution that's simpler, smarter and it'll save you money.

We've listened to our global family of over 180,000 hospitality professionals and designed an integrated payment solution that will deliver a huge difference to your bottom line.

MAKING IT EASIER FOR YOU TO GET PAID

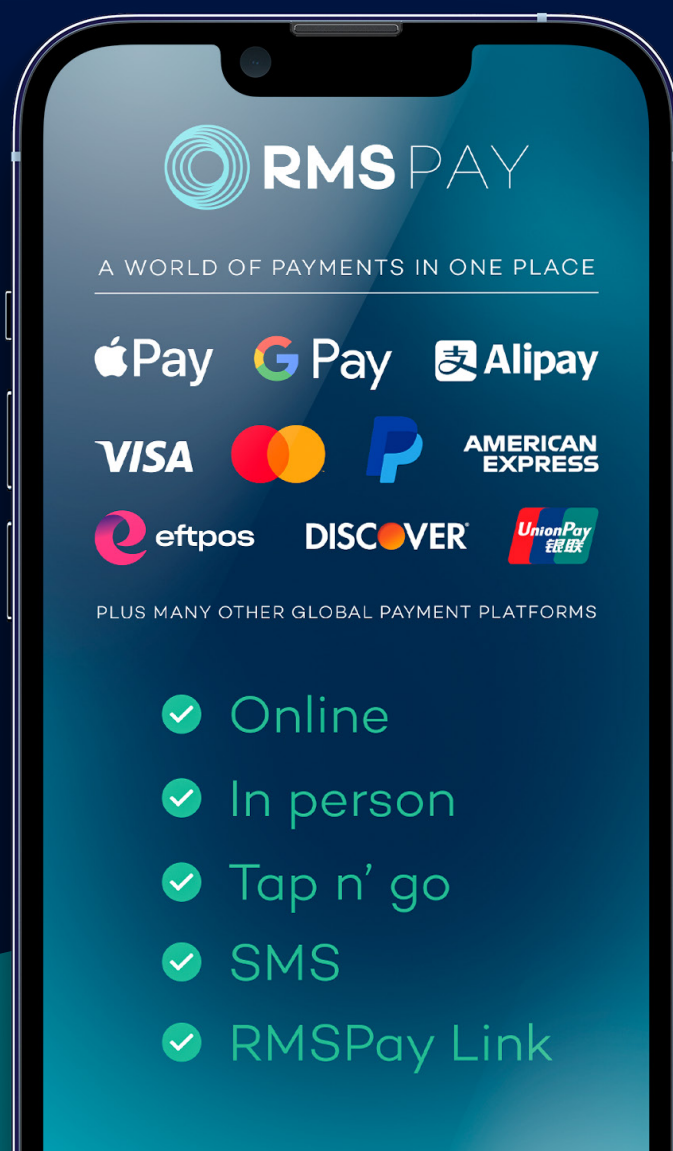

RMS Pay is a fully integrated payment solution within the RMS Property Management System that allows users to process all their payments within a singular, unified platform. From online payments to in person credit card transactions and digital wallets, RMS Pay allows operators to safely process a wide range of payments which will provide their guests the ultimate flexibility in using their preferred payment methods.

RMS Pay has been designed to drive operational efficiencies in the financial processes needed by hospitality businesses, leading to significantly reduced touchpoints for both staff and guests leading to a greater overall guest satisfaction, lowered manual reconciliation and handling errors and increased reporting accuracy. It's the payment solution you have been waiting for.

END OF DAY MADE SUPER SIMPLE

We know you want to focus on your guests, not spending hours trudging through administration. RMS Pay is a native feature of the RMS system so you can control settlements directly from your PMS. RMS Pay will align settlements to your End of Day (EOD) process with improved functionality and more accurate and insightful reporting. Plus, you can manage settlement funds on one property or groupwide and move funds between properties or merchant accounts - before settlement occurs.

reporting**

INTEGRATED PROCESSES MAKE ALL THE DIFFERENCE

Remove friction from your payment processes once and for all. Payments process quicker, settlements happen automatically, automated triggers ensure payments are requested and processed without your staff having to even lift a finger. RMS Pay has been designed to be the ultimate payment solution for hospitality businesses, just like yours. Once activated in the RMS Module Market, you're up and running quickly and can immediately begin to accept payments from any device or channel.

Premium payment features of RMS Pay include smart tech which saves you money with every payment. Least cost routing automatically chooses the payment method that costs you less, and the processing fees of RMS Pay are the most competitive in the market. Dynamic currency conversion (DCC) gives international businesses the ultimate flexibility to tailor to each guest and incremental pre-authorisation means operators minimise exposure.

THE ONLY PAYMENT PLATFORM WITH MILITARY GRADE SECURITY

When it comes to handling payments safely, nothing is more important than knowing your guests and your business is protected by state of the art security. RMS Pay is protected by FEDramp certified security measures meaning it is part of the best protected platforms in the market. You can store your guest information with card tokenisation, keeping transactions quicker and more secure. And because there is no need for third-party involvement in your payment process, the entire end to end system is inherently more secure.
